Summary

Summary

MERN Full Stack Developer with hands-on experience building full-stack web applications using React.js, Node.js, Express.js, MongoDB, and MySQL. Skilled in developing RESTful APIs, secure authentication, and db applications, with a strong foundation in DSA, OOP, DBMS, Operating Systems, and Computer Networks.

Skills

Programming Languages: Java, Python, c, JavaScript
Frontend: HTML5, CSS3, Bootstrap, React.js
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MySQL, MongoDB,
Developer Tools: Git, GitHub, Maven, Postman, Tomcat
Core Concepts: Data Structures & Algorithms, OOPS, DBMS, Operating Systems, Computer Networks ,SQL

Experience

Mern Stack Developer **Sep 2024 – Present** *Enginow* *React, Node.js, Express.js, Mongodb, MySQL*

- Developed responsive web applications using the MERN stack.
- Built REST APIs and integrated frontend with backend services.
- Used Git and GitHub for version control and collaboration.

Projects

AI-Powered Chat Assistant — React, Node.js, Express.js, MongoDB, JWT, Gemini API — 2026

- Developed a full-stack AI chatbot application using the MERN stack with secure JWT-based user authentication.
- Integrated Google's Gemini API to generate intelligent, context-aware conversational responses.
- Designed MongoDB collections to securely store and retrieve user-specific chat history.
- Built RESTful APIs using Express.js to manage authentication, chat sessions, and user data.
- Deployed the frontend on Vercel and the backend on Render for reliable cloud hosting.

My Diary Web Application — Node.js, Express.js, MySQL **2025**

- Developed a secure full-stack diary management application with user registration and authentication..
- Implemented CRUD operations for creating, viewing, updating, and deleting date-wise diary entries.
- Designed and managed a MySQL database for storing user information and diary records efficiently..
- Built RESTful APIs using Express.js for user authentication and diary management features.
- Developed a responsive interface to provide a seamless and user-friendly journaling experience.

Role-Based Leave Management System — PHP, MySQL, HTML, CSS, JavaScript **2025**

- Developed a role-based Leave Management System with secure user authentication.
- Implemented leave application, approval, and tracking using PHP and MySQL.
- Designed responsive interfaces and CRUD operations for efficient data management.

Awards & Certifications

- **Infosys Springboard Web Development using HTML & CSS**
- **NPTEL Data Science**
- **Mern Stack Internship**

Education

Bachelor of Technology (B.Tech) Under Graduate: 2027 *Lendi Institute of Engineering and Technology*
CGPA: 9.01 / 10
